## Experience

---

**Junior Software Engineer, Thessalikes Aggelies** 01/2026 – Current

- Executed comprehensive functional QA testing to ensure seamless website performance and reliability.
- Redesigned and optimized the UI/UX by integrating new iconography, dynamic search filters, and streamlined navigation elements, significantly improving the overall user experience.

**Internship, Thessalikes Aggelies** 07/2025 – 12/2025

- Implemented a dynamic template automation for listing descriptions, drastically reducing data-entry time.
- Organized the listings database and mapped complex location hierarchies.
- Conducted QA testing across the platform and provided actionable recommendations to enhance the UI/UX.

**Kitchen Assistant** 04/2023 – 01/2025

## Education

---

**Software Engineering, TEI Larissas** 02/2019 – Current

## Personal Projects

---

**Portfolio Website, HTML, CSS, Javascript**

- Engineered a fully responsive, bilingual portfolio from scratch without UI frameworks (Bootstrap/Tailwind) to demonstrate strong frontend fundamentals and modern CSS architecture.
- Developed a bespoke JavaScript translation engine to seamlessly toggle between English and Greek, alongside a dynamic scroll-spy navigation system.

**Server Administration & Web Hosting, Docker Compose, Nginx Proxy Manager**

- Provisioned and administered a Linux-based Virtual Private Server (VPS) from the ground up.
- Deployed and orchestrated multiple self-hosted services using Docker Compose for efficient containerization.
- Configured Nginx as a reverse proxy to securely route and manage inbound network traffic.
